

## Court House Evidence Security

### Minimum Level

*Wireless record transmitted to data base of any entry into Evidence Room using Cyberlock System.*

### Next Level (good)

*Along with record of entry, video camera of all activities near evidence storage room.*

### Next Level (best)

*Wireless transmitted record of key entry into evidence storage room and with RFID tag on evidence the tag will activate video recording when evidence is placed into or removed from storage room.*

*RFID tags on all evidence will also provide inventory of storage room with the press of a button.*
